

Meet our Expert

Dr. Carlos Repullo, DDS

Dentist, Implantology, Prosthodontist

With over 20 years of Implant Dentistry experience, Dr. Carlos Repullo graduated from ISCS-SUL in Lisbon, Portugal, and is Diplomated in Implant Dentistry and Advanced Certificate in Implant Dentistry by the prestigious Royal College of Surgeons of England (London UK). He is also certified as a CEREC trainer by the International Society of Computerized Dentistry (ISCD), Cerec Advocate and Key Opinion Leader in the area of implant dentistry and digital dentistry. He is a member of the Academy of Digital Dentistry and founder of the Caddental training center.

THE CLINIC

Dr. Repullo's state of the art clinic offers participants a unique, high quality learning experience. The clinic features an integrated seminar room and modern surgery suite, allowing participants to observe treatments taking place through both a viewing window, as well as a live broadcast on a large screen. The surgery suite is fully equipped with the latest technology; such as an integrated HD camera in a ceiling pendant system, a Piezosurgery unit, Cerec AC Omnicam, Zeiss Extaro microscope, and all the materials necessary to deliver a fully digital workflow on implants. The venue offers participants the perfect environment to refine their chairside digital dentistry knowledge and skills and take their clinical expertise to the next level.

Digital Implantology using CEREC®

Sevilla, Spain
October 8th – 9th, 2021

Speaker

Dr. Carlos Repullo

the city of passions – Sevilla, Spain

Rich in heritage

The city of Sevilla is the capital of Andalusia; famous for its culture, traditions and heritage.

The home of Carmen, Don Juan and Figaro, Sevilla is filled with stories of passion. This is the birthplace of Flamenco and is the city where the most amazing Easter processions take place.

Much of the city's architecture has a strong Moorish influence, which was the result of the Moors having occupied the city for over 800 years.

Well known historical monuments include the third largest cathedral in the world, the Giralda tower; the wonderful palace of the Reales Alcázares, the magical Barrio of Santa Cruz with its narrow streets and the Maestranza bullfighting ring.

A fascinating city that offers visitors a variety of experiences to enjoy!

How to Get there

The beautiful city of Sevilla is easily reached via the city's international airport.

For help on transport or hotel accommodation please contact

Overview Course Content

This two-day course focuses on digital dentistry from both a theoretical hands-on and live surgical training perspective.

After completion

Participants will be able to:

- use the iSy and Conelog Implants systems within CEREC® workflow
- design restorations using the DAP Digital Assisted Protocol five-step technique
- design a soft tissue moulding emergence profile
- bond abutments and crowns correctly on the Ti-Base
- characterize and deliver the final restorations
- know how to use veneers for implant restorations

Requirements

Dentists must have:

- advance knowledge of implantology
- have a focus on digital dentistry

Certificate

You will receive a certificate for 12 hours continuing education.

Course Location

Dr. Carlos Repullo
Dentalhouse
Ildefonso Marañón Lavín 12
41019 Sevilla/Spain

Content

The course is flexible enough that it can provide a robust learning experience for clinicians who have either a basic or advanced clinical experience level.

The two implant systems iSy and Conelog will be used, including the Ti-Bases for CAD/CAM and scan post for direct and indirect digital impressions.

Guided surgery for implant restorations is introduced using the CEREC® workflow guide 2 system software. The five-step Digital Assisted Protocol (DAP technique) technique to design implant restorations is also discussed.

During the hands-on module, participants design implant-borne restorations using the CEREC® software; plan a guided surgery case and perform the bonding procedure on the Ti-Bases.

Combining theory and hands-on, the live-surgery will cover the iSy or Conelog implant placement, the digital impression, the hybrid abutment design, the milling procedure of the abutment/crown and the bonding procedure on the Ti-Base.
